

Web Developer Recruitment Test

The Task

Set up a one page Umbraco Website that will connect to Youtube API and load a selection of videos from a playlist of your choice.

Homepage	Video List
<p>The home page will contain:</p> <ul style="list-style-type: none">• Title.• Button (<i>Clicking this will refresh the list of Youtube Videos</i>).• List of videos.	<p>The list of videos should contain:</p> <ul style="list-style-type: none">• Video title.• Thumbnail Image.• Link to the video.

End Solution

- A one page Umbraco Website (*Umbraco v7 or v8*)
- Use the Youtube API to retrieve videos from your playlist of choice.
- Save the retrieved content to Umbraco.
- Display the videos on the front end from the Umbraco Content.
- Allow the user to update the content by clicking a button on the front-end.
(*This should call the api and update the list of videos in the backoffice, also displaying the latest videos to the user*).

Front End

This is not a front end challenge, but feel free to be as creative as you like.

Notes

This challenge may take a couple of hours, try not to spend any more than 4 hours on this. If you haven't finished that is fine, we are just looking to see how you approach the situation.

Add comments for any improvements that you would add if you had more time.

Add your code to a public git repo and send us the details.
